

Battery-Electric Shuttle Bus Request for Proposals

Addendum #1: Timeline change

As specified in the RFP document, vehicles will not be considered without a satisfactory Altoona test. It appears Altoona testing is currently taking place for models that would otherwise be considered, and this testing is nearing completion.

In the interest of competition, the City has elected to extend the bid submission timeline, and modify the remainder of the timeline as detailed here:

Advertise Request for Proposals January 9, 2024
